Student Interns prepare tree seedlings for giveaway.

Member & Sponsor Benefits

Council members receive invitations and discounts for Council events and restoration projects, and receive our newsletter and other important environmental updates.

We invite your organization to become an affiliate member or supporter. Your organization or business will be featured on our website and you'll receive discounts on events and other great benefits.

We also offer great promotional opportunities through sponsorship of our annual Summit for a Sustainable TN, Green Tie Affair and other events.

Volunteer

Contribute your time and your talents to the Council. You'll find opportunities every day and for every interest, from legislative work to monthly stream restoration projects to helping out at our many workshops and events.

Contact us at tec@tectn.org for details

TENNESSEE ENVIRONMENTAL COUNCIL

Educating and advocating for the conservation and improvement of Tennessee's environment, communities and public health.

www.tectn.org

What we do...

Tennessee is one of the most bio-diverse states in our nation. Because natural resources form the backbone of our economy, quality of life and heritage, the Tennessee Environmental Council has been working since 1970 to protect public health, Tennessee communities, and the environment. The Council serves as a statewide focal point for the environmental efforts of numerous organizations and individuals, and works on a number of hands-on projects.

Learn more about our projects here, then visit our website to learn more, sign up for our email newsletter for updates and get involved.

Sustainable Tennessee

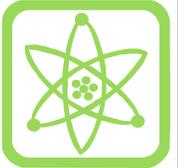

The Sustainable Tennessee Agenda is a roadmap for policy and practice initiatives to move TN to a healthy and sustainable future for its people, places and economy. A broad coalition of citizens, conservation groups, policy experts, business, government, industry, students, educators and more meet annually to develop and implement the Agenda focused on land, air, water, energy and transportation issues.

Since 2007, over 750 participants representing 250 organizations have participated in the annual Summit, Conservation Education Day or other events. Learn more at www.sustainabletn.org

Radioactive Waste Education Project

Tennessee is a major player when it comes to disposal of radioactive waste. Thus, with the support of a grant from the New Mexico Community Foundation, the Council is working to educate Tennesseans about our role in radioactive waste disposal in Tennessee landfills and facilities.

We're reaching out to communities most impacted by disposal issues to ensure they are informed, engaged and actively participating in the Department of Energy (DOE) radioactive waste decision making process. Learn more at www.tectn.org

Watershed Support Center

The Council works with local communities to educate, conserve and restore watersheds (areas of land that drain to a particular river or water body), and protect our drinking water sources. This work includes replanting streamside forests, reducing sediment - a significant source of water pollution, and installing rain gardens to reduce flooding.

We provide communities with watershed tools, educational programs, restoration, and regulatory support. Our Duck River Opportunities Project works to protect one of the most bio-diverse river systems in the world. The Fish Habitat Restoration Initiative provides clean streams and drinking water for people and wildlife. Join us for one of our monthly volunteer outings.

Tennessee Tree Project

Tennessee Tree project has a goal of planting or caring for 1 million native trees in TN. Planting a tree is one of the single most concrete actions you can take to help clean our air, land and water.

Your business, school, church group or other organization can partner with Tennessee Environmental Council for tree planting or tree giveaway events. Non-profit groups may use the events as a fundraiser. Tree seedlings are available mid-January to mid-April, and we offer a limited number of potted trees for planting in the fall.

To date we have planted over 50,000 trees. You may register your tree or get more information at www.tectn.org/tree.
